ABOUT

We like peace and quiet when we work. That's why we started SilentLab, where we create quiet and send it wherever it's needed the most. Our original office acoustical solutions carve out oases of calm and privacy even in the noisiest interior environments.

Open offices are more popular than ever, but along with greater interaction comes overwhelming noise. Thanks to our team of acoustics experts, we enable companies to provide employees with the distraction-free workspaces they need to perform and collaborate at optimal levels. Our unique mobile soundproof offices, acoustical wall panels, ceiling hangings and other sound-reduction accessories are all made at our in-house production facilities in the Czech Republic.

Our holistic approach to sustainable sound empowers us to create complete acoustic solutions. We can also work with you to devise highly customized solutions precisely tailored to your needs. Visual appeal is as important to us as top-tier performance, which is why all our products combine unique designs with maximum functionality.

PRIME

MICROOFFICE

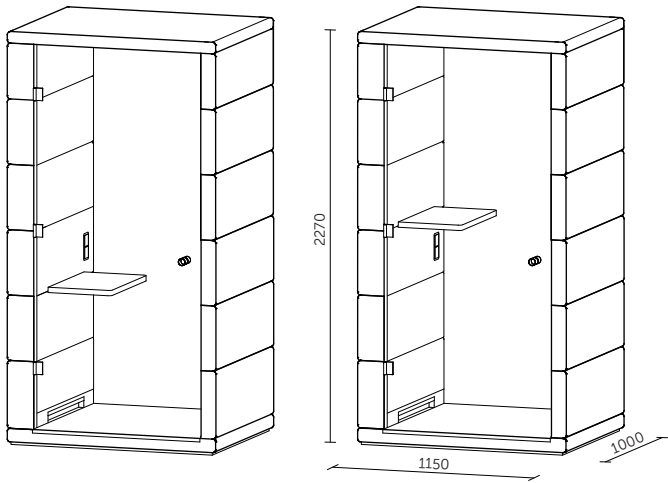

MICROOFFICE

MICROOFFICE PRIME is a standalone haven of silence ready for use without any burdensome installation or renovation. It combines our iconic visual aesthetic with a unique ventilation system, high-end acoustic materials, sophisticated details and practical design.

TECHNICAL DETAILS

exterior dimensions	1150 x 1000 x 2270 mm
interior dimensions	900 x 930 x 2150 mm
weight	350 kg
glass walls	sound-insulating glass
solid walls	sound-absorbing sandwich panel with acoustic insulation
glass wall frame and door handle	solid oak
ceiling	sound-absorbing sandwich panel with acoustic insulation
flooring	carpet (anthracite grey)
ventilation	automatic/manual
lighting	LED
included equipment	desk (two height options: sitting/standing), electric socket, USB and LAN connection
optional equipment	seat (barstool, chair)
color options	decorative fabric (refer to swatches)

PRIME

UNIQ

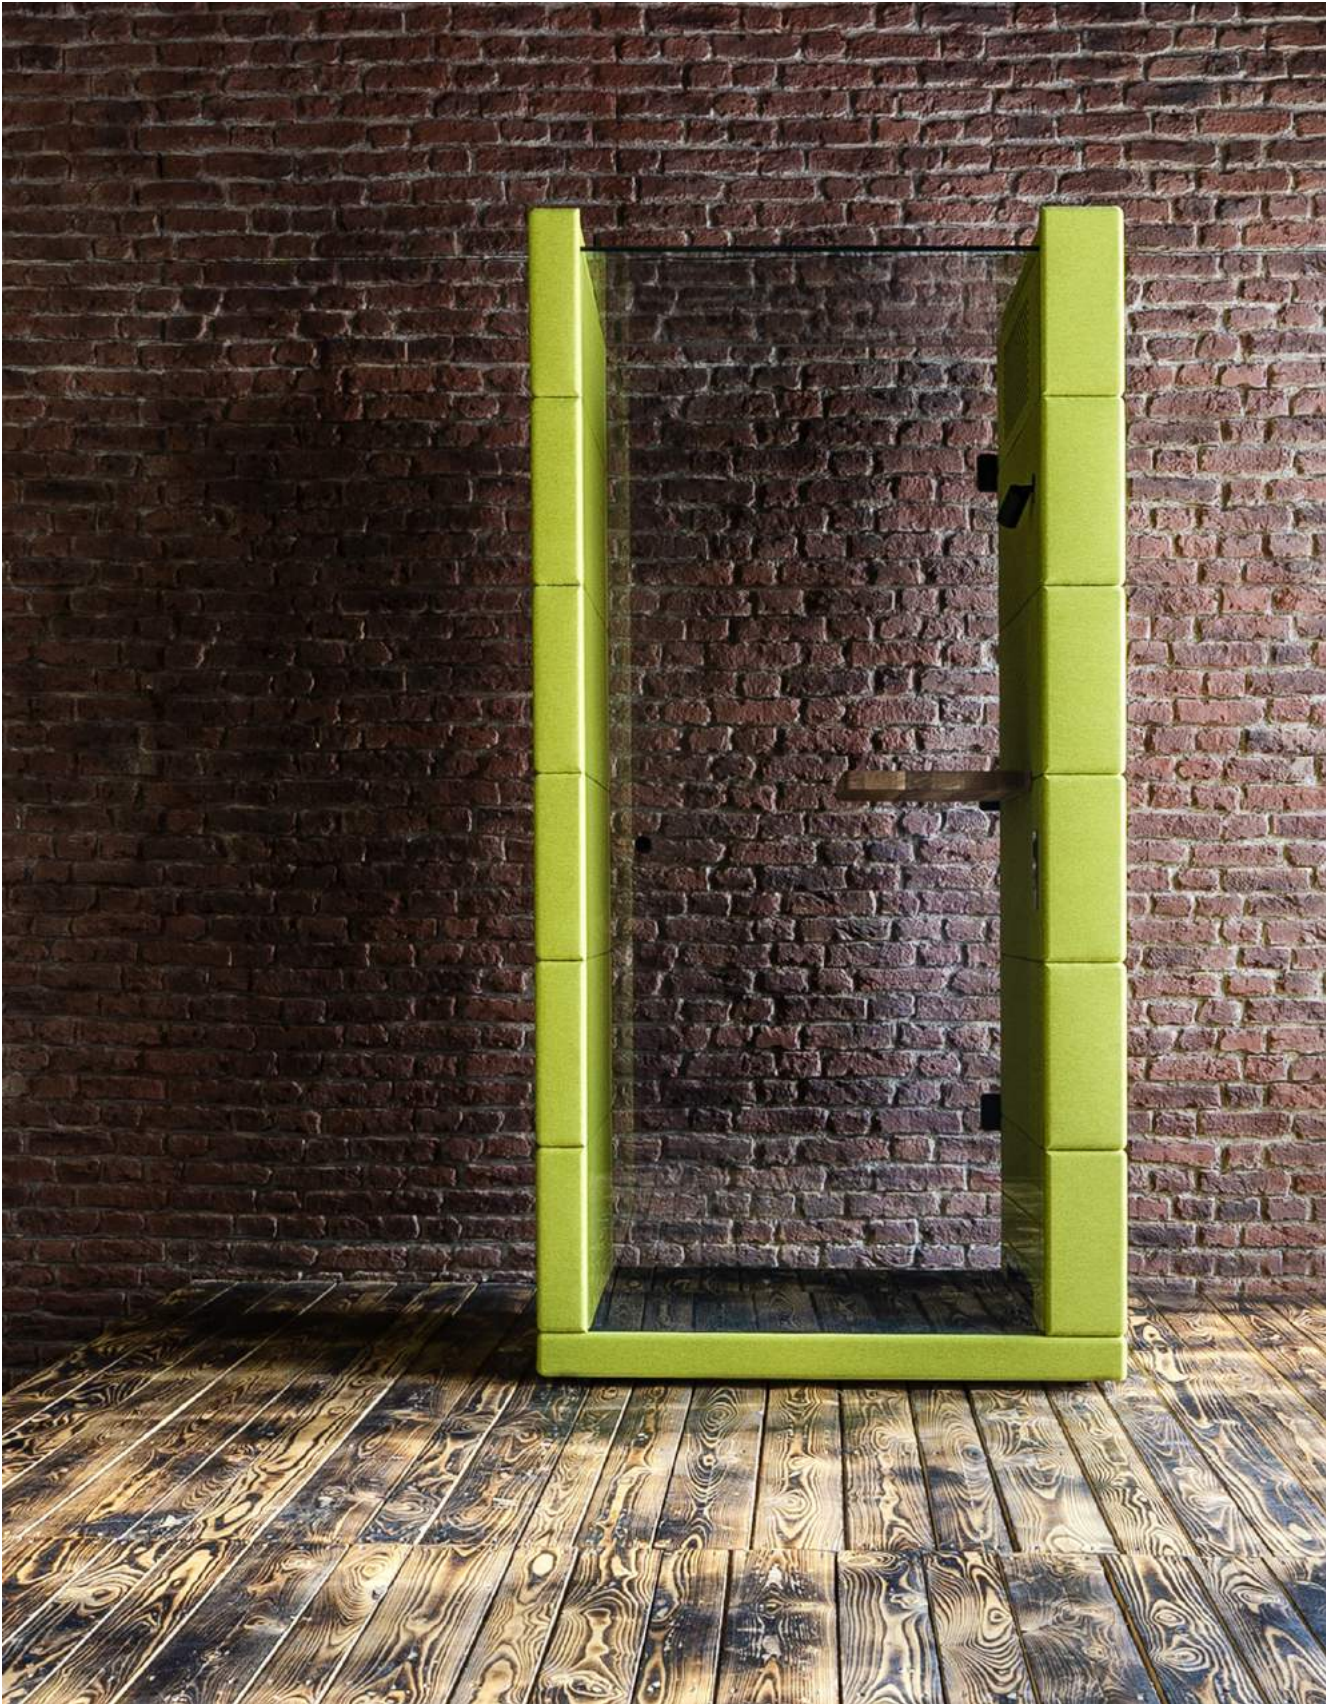

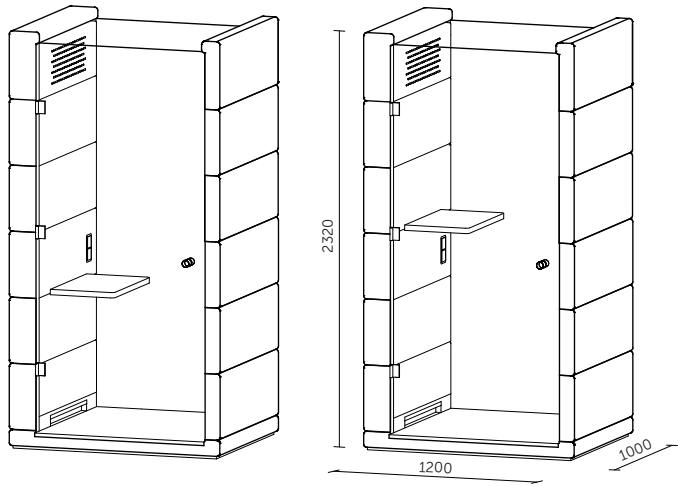

MICROOFFICE

MICROOFFICE

MICROOFFICE UNIQ captures an insulated bubble of peace without the burden of difficult installation or renovation. Our new iconic design features a unique ventilation system, high-end acoustic materials and even more sophisticated details than before.

basic dimensions	550 x 550 x 30 mm
LEAF	non-standard sizes available upon request
basic dimensions	550 x 550 x 30 mm
ROUNDED SQUARE	non-standard sizes available upon request
basic dimensions	550 x 550 x 30 mm
SQUARE	non-standard sizes available upon request
basic dimensions	550 x 635 x 30 mm
HEXAGON	non-standard sizes available upon request
supporting frame	MDF (medium-density fibreboard)
filling	high-performance acoustic foam
finish	decorative fabric (refer to swatches)
installation	cable suspension (up to 1.5m long)

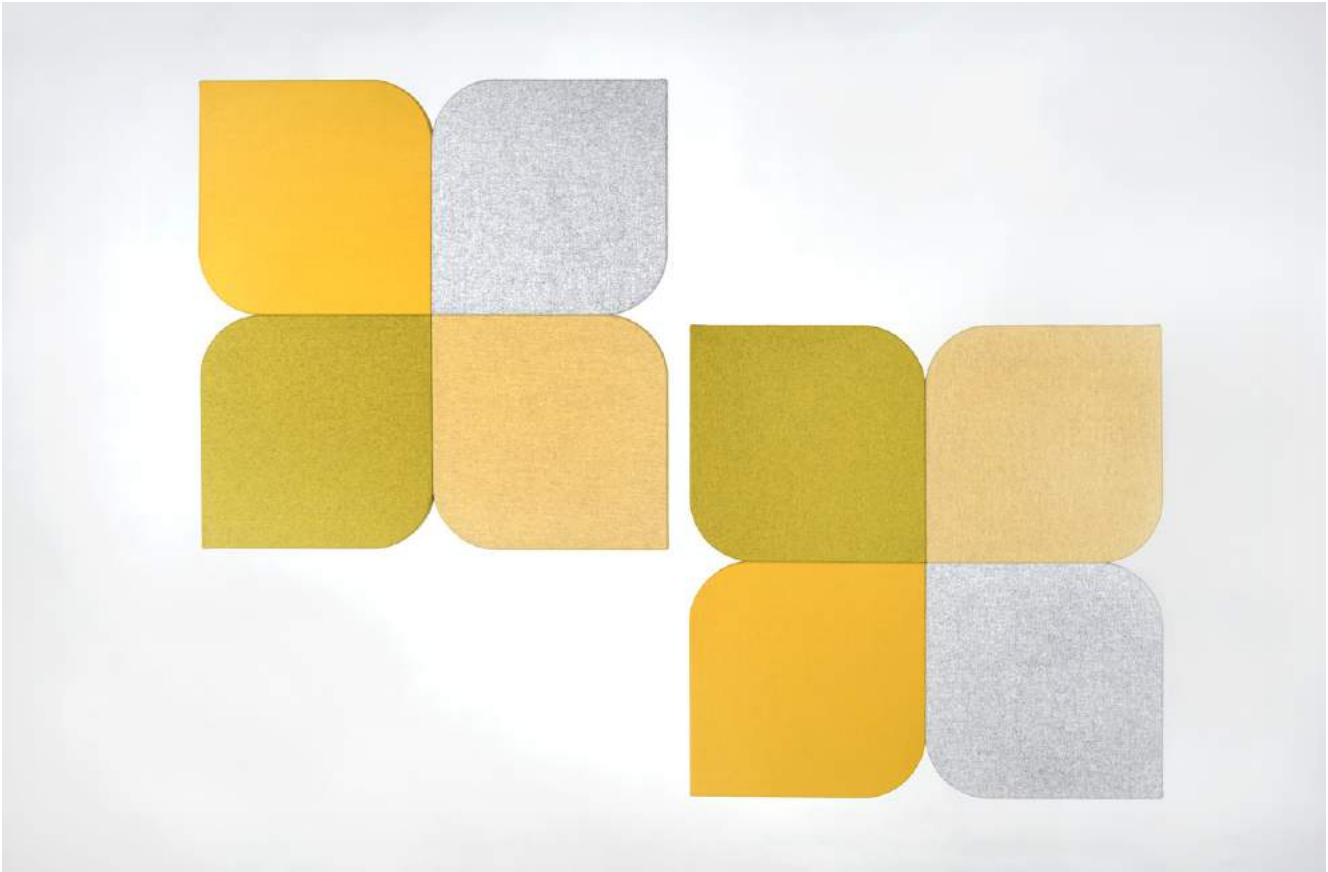

STILL

WALL PANELS

WALL PANELS

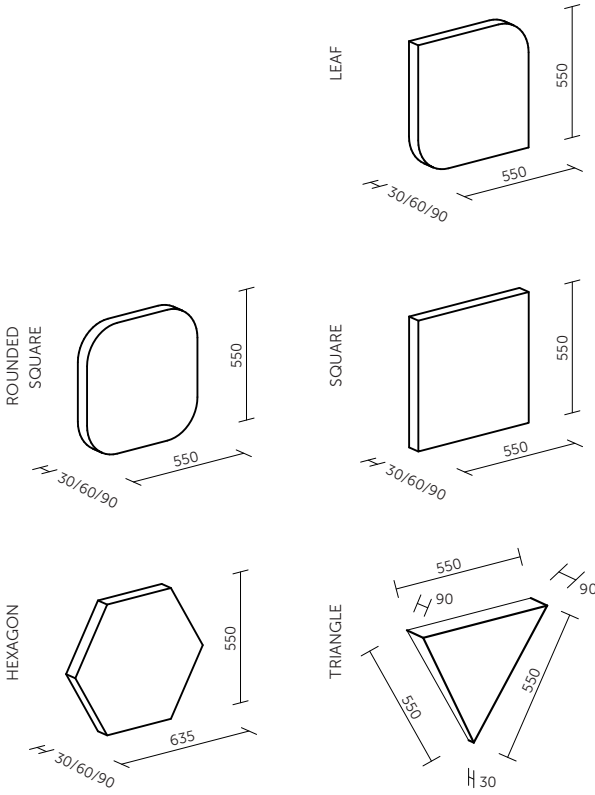

STILL is precision-engineered to absorb the frequencies created by the human voice. The result is a drastic reduction in background noise, making it much easier to converse quietly with colleagues or focus on the task at hand. With a wide selection of colors and shapes available, you'll find an ideal match for your office.

STILL

MYSPACE

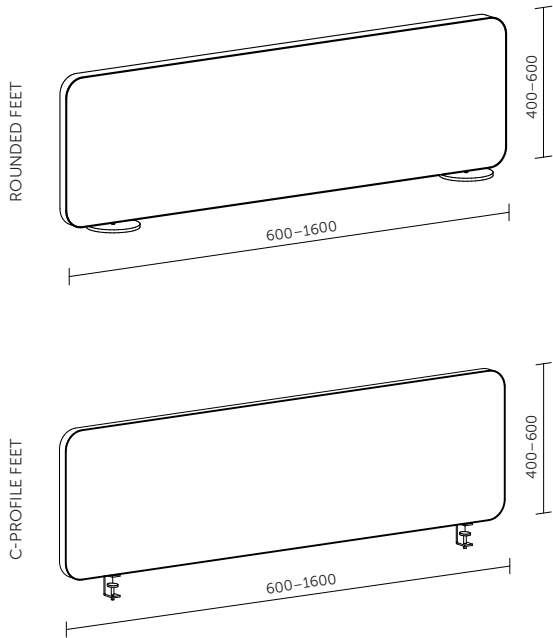

DESKTOP DIVIDERS

DESKTOP DIVIDERS

MYSpace desktop dividers transform vast office floors into individual private workstations. They're made from specially developed acoustic foam, empowering your team to properly concentrate on their work. The high-quality fabric we use also allows these acoustic desktop partitions to double as bulletin boards.

material	central supporting plate lined with sound-absorbing material
finish	decorative fabric (refer to swatches)
installation	cable suspension (up to 1.5m long)

MUTE

MATERIAL LINES

After you’ve chosen the right soundproofing tech for your office, bring it to life in one of three distinctive material options. Take your first steps towards a more tranquil workspace with SOFT, focused on maximizing functionality and value. Next, there’s AMBIENT, which features two fabric options for increased comfort and performance. Finally, the PULSE line combines wood and metal accents with high-end fabrics to achieve the utmost in quality and design.

SOFT

SOFT is our entry-level category, made from BOMBAY fabric for an emphasis on effortless functionality. The PVC exterior is water-repellent and sleek, sure to complement any professional workspace, while metal frames ensure long-lasting quality.

AMBIENT

Our AMBIENT line comprises two appealing fabric choices: the irresistibly soft UNI, made from flame-retardant Trevira CS, or the durable WOOLLAND, with its natural wool fibers and flame-retardant finish. Either way, you’ll enjoy superior comfort and functionality.

PULSE

PULSE blends high-end fabrics with wood and metal components for a striking visual contrast. Our enticing BLAZER, SYNERGY, FAME and BREEZE FUSION fabrics are exclusively sourced from verified partners who place a high premium on quality. As stimulating to the eye as they are to the touch, PULSE designs feature vibrant quilted arrangements with warm colors that promote creativity and enthusiasm.
